

Hello Committee Members, I am writing to support Deer hunting on Sunday using Archery on parcels of private property. I am an archery hunter who works full time during the week. Sunday hunting would allow for more hunters to be in the woods and continue to deal with the effects of an oversized deer population. Too many deer are causing car accidents, destruction of valuable landscape and transmission of lyme disease. This matter has come up several times during past years and deserves to be approved, since many antiquated Blue Laws have already been eliminated. Thank you.
